JEWELRY MANAGEMENT SYSTEM (JeMS)

(Multi Language – Multi Stores Management – RFID & Anti-Theft Ready)

JeMS is fully integrated and compliant with Barcode and RFID tracking, using the RFID tags to ensure top security

Highly scalable and modular web based Jewelry Management and Tracking System, exclusive catering to the needs of both small and large jewelry retailers and wholesalers alike. JeMS offers a one-step solution that provides efficient and accurate inventory details with easy-to-use invoicing, reporting and tracking of gold, diamonds and other ornaments. JeMS core modules include Purchase, Sales, Accounts, Inventory, and Live Gold rates supported by extensive reporting.
